Vitamin B12	20 mg
Niacin	5 000 mg
Biotin	10 mg

Others elements / Litre

Propylene Glycol	150 000 mg
Sorbitol	55 000 mg

TECHNICAL INTEREST

AVIB+® is strongly recommended for breeders and layers during the oestrus and reproduction cycle.

AVIB+® allows to avoid deficiencies of B group vitamins that can impact severely the general growth and reproduction performance of the poultry. Vitamins included in **AVIB+®** take part on the development of the embryo and so, contribute to maintain the laying peak and to improve the hatchability.

AVIB+® improves the skin protection and favors a better feathering : another important action of B group vitamins.

AVIB+® brings also energy and main vitamins (A, D3, E, C) to support the growth and general status of the animal.

DIRECTIONS FOR USE

Pour **AVIB+®** directly in the drinking water at the following recommendations :

- Broilers : 1 litre in 1000 litres of water during 3 to 5 days.
- Breeders : 1 litre in 1000 litres of water during 3 days : renew the application twice a month.
- Layers : 1 litre in 1000 litres of water during 3 to 5 days at laying peak

PACKAGING : 1, 5, 25 litres

SHELF LIFE

24 months after date of manufacturing.

OTHER INDICATIONS

Storage in a cool, dry and dark place
Close well the bottle, in a hermetic way, after usage.
