

KenomixTM

JUST SHAKE IT!

- ▶ Ultimate disinfection
- ▶ Very low consumption
- ▶ Spectacular color
- ▶ Gentle on the skin
- ▶ Long-lasting stability

Total protection of the teats!

To enter in the very strict selection of the Keno teat dip range, disinfection without skin irritation is essential. CID LINES has developed a perfect combination between strong disinfectant properties and total teat care formulation: Kenomix!

Kenomix is a strong and long-lasting post milking teat dip for the disinfection and protection of the teats. This chlorine dioxide (ClO₂) based teat-dip is prepared in situ by mixing Kenomix with Kenomix Activator. "Just shake it!..."

Kenomix leaves a beautiful, bright blue coloured film on the teats. Due to the barrier technology incorporated in Kenomix, the nicely even spread film creates a viscose droplet at the sphincter, closing off the teat canal.

Furthermore Kenomix doesn't drip which makes it very economical in use. The average consumption of Kenomix on farm level is recorded at only 2,5 liters per cow per year!

Long lasting stability = Long lasting activity

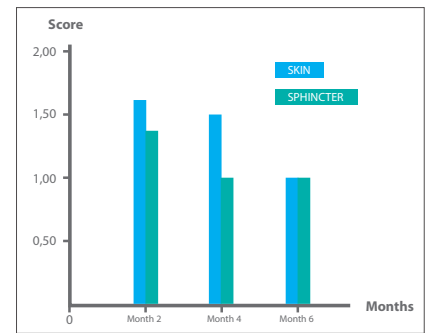

1h after mixing Kenomix with Kenomix Activator, the ready-to-use solution produces a median value of 0,0157% w/w of chlorine dioxide and can be used for 26 days.

Kenomix has been specially developed to generate a stable amount of chlorine dioxide within time which allow stable efficacy only due to chlorine dioxide. Therefore no other active ingredient must be added to keep efficiency. The figures presented above represent the evolution of the chlorine dioxide content during the shelf life of the mixture.

Hard on bugs, soft on skin

The first ClO₂ teat dip that isn't aggressive on the skin but improves the teat skin! The Kenomix formulation contains a high % of emollients (10%) which ensures an excellent teat skin condition.

Test results

EN 1656 test of bactericidal activity with presence of milk

Staphylococcus aureus

Streptococcus uberis

Escherichia coli

EN 1657 test of algicidal activity in presence of milk

Prototheca Zopfii

Just shake it !

Take out

Mix & Shake

Wait 1h

Dip

Discard any teat dip cup that becomes contaminated or dirty. Always use a clean dip cup. Storage: Store upright in original, tightly closed container. Protect from frost. Do not mix with other products than Kenomix Activator.

Compatible with The Pure Dipper
