

# Kenopure<sup>TM</sup>

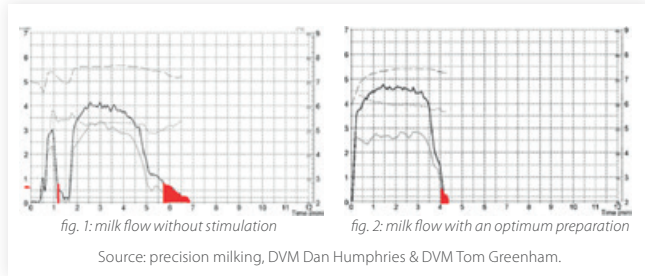

## PURE PREPARATION

- ▶ cleaning & sanitising
- ▶ skin conditioning
- ▶ versatile use
- ▶ the perfect match for The Pure Foamer

## Udder preparation: a waste of time?

By cleaning the udder before attaching the milking unit, the udder is well prepared. During this preparation, oxytocin can be released, thus the total time of milking is less. Another advantage of pre-treatment is: that it decreases the risk of contamination due to environmental pathogens.

## Kenöpure™: the complete preparation before milking

### 1 CLEANING

Non-ionic and anionic surfactants

- Acts uniformly on the whole teat skin and end
- Reduces surface tension on soiled teats
- Removes dirt quickly and efficiently

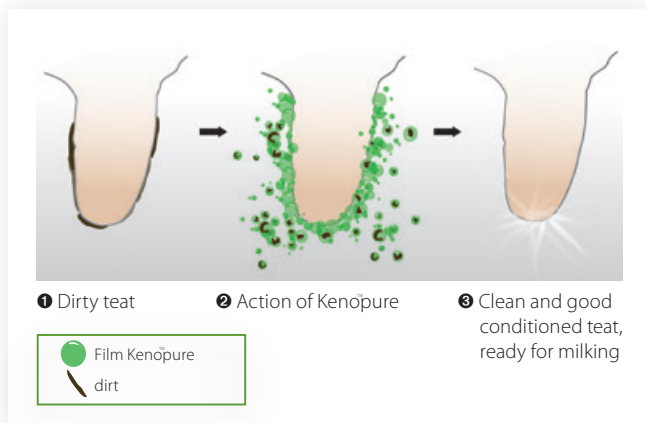

### 2 SANITIZING

Lactic acid 8%

- Natural molecule with fast sanitizing and gentle action on the skin
- Efficiency recognized by EN1656 test and by field trials in 30s contact time with foam or spray application

### 3 TEAT AND UDDER CONDITIONING

Glycerin: conditions and moisturizes teats for improved milking. Kenöpure application encourages the release of oxytocin that stimulates milk let down.

## 4 different methods of application:

### 1 FOAM CUP

- Prepare a 40% solution in clean water (400 ml of Kenöpure for 600 ml of clean water)
- Squeeze cup to activate foam
- Make sure all the teat is covered with foam
- Wipe the teat with one paper towel per cow, pay particular attention to the teat end

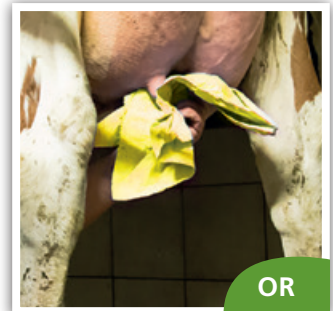

### 2 SPRAY

- Prepare a 10% solution in clean water (100 ml of Kenöpure in 900 ml of clean water)
- Spray all around the teats
- Wipe the teat with one paper towel per cow, pay particular attention to the teat end

### 3 REUSABLE CLOTH

- Fill a bucket with 10 L of clean warm water and add 50 to 200 ml of Kenöpure
- Soak cloths in solution
- Use one cloth per cow
- Wash all the length of the teats and pay particular attention to the teat end.
- Use the other side of the cloth and dry the teats
- Clean and disinfect used cloths before reusing them

### 4 THE PURE FOAMER

- The system makes pre-milking easier than ever! The Pure Foamer is simple, economical, reliable, powerful and effective. No more "bottle-squeezing", just press the trigger.
